Mirror Win Four Games

At Alls on July 3rd, Mirror defeated Red Deer in an exhibition game, Mirror hitting to advantage:

Red Deer.....200 000 200—6 8 2
Mirror.....201 000 208—13 21 5

Mirror carried off first money at the New Norway tournament on July 4th. The first game resulted as follows:

R H E
Camer...100 000 100—2 7 4
Mirror.....100 000 000—3 8 1

In the second game Tofield got the best of the argument with Sedgwick, score 2 to 1.

The final game brought Mirror victory, the former registered their seventh shut-out of the season.

R H E
Tofield.....090 000 000—5 2 6
Mirror.....100 000 000—6 1 1

The feature of the day was the playing of Walker for Mirror. He pitched both games and fielded his position well.

Others who assisted in making the camp an unequalled success were Rev. W. B. Bradley, of West Hill, study teacher; L. Williams, of Forestburg, grandly; G. Stewart, of Forestburg, birds and flowers; Bill Batt, of Cochrane, and Mrs. E. F. Farley, bird specialist, of Cochrane, and L. E. Might, of Mirror, athletics.

The camp was organized on June 26th, and the opening ceremony was the election of the head chief, J. P. Berry, who became Chief Kee chee mo kanoh (the name given to the Indians to the leader of the American people, meaning "Big Knife").

The camp was then divided into tribes each with a great chief (a mother) and a child (a priest). These were tribes namely, Blackfeet, Cree, Pocahontas, Manitou and Shawnee.

All town names were dropped.

The members became braves of their respective tribes.

Names chosen were Chief Red Cloud, Pontiac, Grey Wolf, White Fang and Water Crest, etc.

Each tribe competed against all other tribes for points in campfire, athletics, etc.

F. WHITING.

Card of Thanks

I wish to thank everyone who donated towards the fees for the children's sports on Dominion Day, and also those who assisted so diligently in carrying out the program.

F. WHITING.

The Mirror Canadian Nationals have played 19 games to date, of which 15 were won, 2 drawn and 2 lost.

WEED INSPECTOR IS APPOINTED

The council of the Municipal District of Lamerton, No. 308, met at the municipal office at Alls on July 14, at 10 a.m.

All the members were present, Reeve D. M. Jewell in the chair.

The minutes of the regular meeting held June 14th, were adopted on motion of Councillor Olson.

Mr. Taylor, field inspector of the Department of Agriculture, Education, met the council in order to advise the members of the municipality and asked for the co-operation of the council with the department in an endeavor to eradicate the present curse of the noxious weeds.

The council, after considerable discussion in regard to the situation, voted to instruct the council to meet with the minister in order to discuss the present situation.

Major Bourne, of the Salvation Army, met the council and gave the council some idea of the work in regard to rescue work among the noxious weeds.

The council voted to have the sum of \$100 towards this work and the motion was carried unanimously.

In the matter of the lease of road allowance 11-12-13-21-24, the council voted to accept the advice of the legal counsel, the lease was cancelled on account of the difficulties presented.

The resignation of A. H. H. H. Williams, on account of his illness, was accepted, and C. Wolferstan was appointed in his place, the pound for division was established at N.W. 36-39-24-3.

On motion Councillor Sherburne was allowed two weeks vacation, to commence July 7th.

On motion Reeve Jewell, a donation of \$100 was allowed the Clive fair committee.

Meeting adjourned at 4 p.m.

R. G. LOWE, Secy. Treas.

Meeting was spent in instructional work under Mr. McChesney, and the members of the council engaged in creative activity, the evening in group games and the "Beloved" where campfire was read and songs performed by tribes, songs, singing, etc.

Special features of the program were bird lectures illustrated by lantern slides by Mr. Farley, and a 14 mile excursion, also lectures on "The Stars" by Rev. Mr. Berry, the very thorough swimming and life saving instruction by "Bill" of Camrose.

At the boys received badges or the points required to obtain a C.S.E.T. badge. It is to be hoped that each town in the vicinity of the camp will encourage the attempt to aid the boys in coming to a high standard of efficiency.

Last but not least the most popular person in camp was Rev. J. P. Berry, whose white name is Mrs. Doherty. Cooking for hungry lads is no joke. Well, Mrs. Pocahontas keeps the braves happy.

Last night the camp for boys drew to a close and was well symbolized in the dy-

ing embers of a glowing campfire, names of the campers had arrived and together "squaws" and braves met. The braves and their big chiefs expressed regret at their having to break camp and only then did the girls would have a happy and beneficial time together.

Sixty girls are registered this week, camp, Cheekeepac, Point Thirteen, Buffalo Lake, under camp directors, Mrs. J. F. Slight, of Camrose.

ORANGE PEKOE QUALITY

The Cost Of Automobiling

There are at least 150,000 new automobiles in the three Prairie Provinces, and it is undeniably a safe and conservative estimate to place an average value of \$1,000 on these cars. This represents an approximate investment for cars alone of one hundred and fifty millions of dollars.

The purchase of a car is, however, but the beginning of the expense. In the cities and larger towns ownership of a car involves the building of a garage in which to house it, or the payment of rent for a garage. In 1913, the cost of a garage was \$100 per month. Last year includes thousands of permits for private garages, and the cost of these would in the aggregate provide for the erection of many residences.

Then before the car can be operated a Government license must be obtained, and the cost of these varies according to size and cost of the car, but a low average may be placed at \$100 per car, or a total of two and one-half millions of dollars paid to Government.

Gasoline and oils are a further requisite. If a car is not to stand idle, again striking averages it is probably not excessive to assume an average of two gallons of gasoline per car per day, for, say, a period 200 days in the year, a total of 400 gallons per car per year. At 10 cents per gallon this amounts to \$40 per car per year.

Getting value in service for his capital investment in a car, gasoline consumption would, therefore, amount to \$20,000 gallons a day, or \$600,000 gallons for the 200-day period, and at 35 cents per gallon will result the substantial total of \$21,000,000.

Add oils and the car will not fall far short of twice five million dollars.

Then comes the 800 extremes of difficult to estimate, for tires, repairs, recharging and replacement of batteries, and public garage services of one kind and another. Let this be placed at the low average of \$100 per car—some new cars will run less than this, but others will exceed it several times over in a season—and the total cost to the car owner will be \$100,000.

Insurance is another item in the cost of ownership. The annual cost of maintaining the West's large and steadily increasing fleet of motor cars is between fifty and sixty million dollars.

To the extent that cars are used for business purposes, and are, therefore, even more productive for the owner, this large expenditure in these areas, "hand them over to the devil." But it is a well-recognized fact that tens of thousands of these cars have been purchased and are used for pleasure purposes only.

Ownership of cars was kept in bound and limited so long as the purchase of one was a spec cash proposition, although even then some people were wealthy enough to mortgage their homes and businesses to buy a car. When the automobile became a popular possession, however, and at the time of small cash payment down, it became a case of "keeping up with the Joneses" and everybody began doing it, many little realized that the monthly cost of upkeep of a car was all that the car could stand without also having mounted on it.

City men use a car now instead of walking a score or so of city blocks to their offices, thus losing the exercise which their sedentary occupations make so necessary to good health and physical fitness. On the other hand, the automobile has made it possible for city people to get out into the country to hunt, to go to the beach, golf links, etc., in an effort to keep fit as possible. It has given the city dweller many opportunities than a rabbit to take the children out for a airing. It has been an important factor, along with the rural telephone, in banishing much of the isolation and loneliness of farm life, and in times of sickness and accident has become indispensable to doctor and nurse.

Ask Provinces To Share Pensions Cost

Government Would Half Amount ing to \$11,800,000 Per Annum

Old age pensions of \$20 a month to men at the age of 70 who were members of the Legion of Honour by the Special Committee on Old Age Pensions. It is estimated by the committee that the number of persons requiring to be pensioned under the plan would be approximately 100,000, or one-tenth of the total population of the Dominion at the age of 70. The total cost of the scheme to the Dominion is placed at \$11,800,000 per annum. This is only one-half the amount being asked under the plan, so previous to its adoption, the plan to provide the other half and to pay cost of administration of the act. Residence of 20 years on the part of a British subject is fixed as a condition of pension ability while the plan must be naturalized and to reside here for 22 years in order to qualify.

A Wise Suggestion

The Made-in-Canada movement, I wonder, why don't you get rid of that piano and "ave the wireless"—look what a lot of dust it'd save.

The idea that one of life's greatest worries is the fear of losing the job is not borne out by the leisurely way in which many people go to it.

Saskatchewan Crop Production

Value of Field Crop For Last Year

Placed At \$249,213,740

The value of field crop production for the prairie provinces in 1913 is placed at \$249,213,740, according to official returns made by the Department of Agriculture.

The value of other farm products, including wheat, barley, oats, canola, etc., was \$25,632,000 bushels from 12,731,900 acres, or an average of 1.95 bushels per acre. There was a total yield of 218,075,000 bushels of canola from 139,570 acres, an average of 14.95 bushels per acre.

It is of interest to note that the area under grain, for previous years, has increased, under the plan, to provide the other half and to pay cost of administration of the act.

Residence of 20 years on the part of a British subject is fixed as a condition of pension ability while the plan must be naturalized and to reside here for 22 years in order to qualify.

For Rheumatic Pains

The palms and soles of the feet should be treated with Dr. Thomas' Electric Oil.

The sooting and healing properties of this oil have been demonstrated for fifty years.

Use it also for inflammatory diseases, rheumatism, bruises and sprains, either in human beings or the lower animals.

Light Thoughts

"What be ye thinkin' of Janet?"

"Notin' much."

"I wot you've thinkin' of me?"

"I wot."

Human hair varies in thickness from the 250th to 6000th part of an inch.

CHILDREN CRY FOR "CASTORIA"

A Harmless Substitute for Castor Oil, Paregoric, Drops
and Soothing Syrups — No Narcotics!

Mother! Fletcher's Castor Oil
has a reputation for
treating babies and children of Constipation,
Flatulence, Wind Colic and
Diarrhoea; allaying Fervorishness arising
therefrom, and, by regulating the
Stomach and Bowels, aids the assimila-

tion of Food; giving natural sleep
without opium. The genuine bears
signature of

Da H. Fletcher.

The Shield Of Empire

British Special Service Squadron Last Word in Efficiency

The visit of the British special squadron at Victoria in the course of the year 1913, was a visit of a force that could not fail to appeal to the pride and patriotism of every true Canadian. For it represents, not only a branch of His Majesty's service but is a force exceeding in every way but a power which did more than any other to end the last war, and which today is the most potent in preserving peace.

Foreign embassies have decided

on the continent of Europe, when troubles threatened or disorders occurred, there was no sight more

reassuring than that of the Union Jack. After the visit of the British Embassy or British Consul.

It was, he said, an emblem of security

which the people of every country re-

spected and appreciated.

At the time of peace no less than

now, the British Consul was con-

ferring, even in the appearance of a

British far. He is a type that in-

spires confidence and is as irrepre-

hensible a sight as a lion.

At the sight of the sun and of man,

getting more out of life in a limited

time than any other human being and,

ready, aye, ready for any emer-

gency.

Thus comes the 800 extremes of difficult to estimate, for tires, repairs, re-

charging and replacement of batteries, and public garage services of one kind

and another. Let this be placed at the low average of \$100 per car per day,

or a period 200 days in the year,

a total of 400 gallons per car per year.

Getting value in service for his capital investment in a car, gasoline

consumption would, therefore, amount to \$20,000 gallons a day, or \$600,000 gallons for the 200-day period, and at 35 cents per gallon will result the substantial total of \$21,000,000.

Add oils and the car will not fall short of twice five million dollars.

Then comes the 800 extremes of difficult to estimate, for tires, repairs, re-

charging and replacement of batteries, and public garage services of one kind

and another. Let this be placed at the low average of \$100 per car per day,

or a period 200 days in the year,

a total of 400 gallons per car per year.

Getting value in service for his capital investment in a car, gasoline

consumption would, therefore, amount to \$20,000 gallons a day, or \$600,000 gallons for the 200-day period, and at 35 cents per gallon will result the substantial total of \$21,000,000.

Add oils and the car will not fall short of twice five million dollars.

Then comes the 800 extremes of difficult to estimate, for tires, repairs, re-

charging and replacement of batteries, and public garage services of one kind

and another. Let this be placed at the low average of \$100 per car per day,

or a period 200 days in the year,

a total of 400 gallons per car per year.

Getting value in service for his capital investment in a car, gasoline

consumption would, therefore, amount to \$20,000 gallons a day, or \$600,00

SENATE GIVES THE HOIST TO BRANCH LINES

Ottawa.—Five Canadian National branch line bills were voted in the Senate. Four of the bills are in Saskatchewan; the fifth is in Nova Scotia.

The four Saskatchewan bills are:

Tyndale to near Hafford.

Lloydminster northwestern 45 miles.

From Radway, Bengeugh or Rittlee.

The first three were killed either by formal motion to hold or by the negative vote of the Senate. The fourth was killed by concurrence in a report from the Senate railway committee, that construction of the line "was not expedient." The Nova Scotia line from New Glasgow to Yarmouth was killed in the same manner.

Three Alberta lines received third-reading: a joint section, from Rosedale, westerly, between Hanna and Wainwright.

It was a day of sharp debate.

Sir James Lougheed, Conservative leader, charged the Canadian National roads with an orgy of extravagance. No mention was made of the fact that the road had received the largest share of the Imperial of the general extravagance would be found stamped upon it. He spoke of officials of the road "sapping in hotels with an amphibious nectar of the gods."

After Sir Lougheed's motion for a six months' hoist of the Tyndale branch carried by 45 to 23.

Third reading was given the bill authorizing the Rosedale branch in Saskatchewan.

The Hanna branch in Alberta and the Lovers branch in Saskatchewan were also given third reading.

The Lloydminster branch in Saskatchewan was given three months' hold on motion of Sir James Lougheed and Senator Robertson. Their vote was 47 to 23. In opposing the Lougheed amendment, Senator Durand maintained that the Lloydminster branch had a good proportion for the C.P.R. It was good, he said, the C.N.R. That was the best evidence, he thought, that the territory was a paying one. He pointed out that this bill had been discussed in committee for a year and a half. Obviously and this attack from the blue on the floor of the chamber saved of star chamber methods.

Opposition to the bill came from Senator Griesbach who pointed out that pioneer railway lines had gone far toward settling the country. Senator Robertson declared that his chief criticism of C.N.R. executive officers was that they had been too eager to settle the country before the committee and gave him the impression that they had no confidence in the paying possibilities of the lines they had.

The question of C.P.R. versus C.N.R., said Senator Robertson, "but it is a question of whether we are going to build a railway line to every man's granary. If the C.N.R. propose to do it, the Lord help us." In making his speech in defense of the preamble of the bill for the Radville line, Senator Robertson said that it would be a great mistake to build this line. There had been a change in the government-Labor or otherwise.

Senator Whibley argued that the settlers in the district through which the branch would run were vitally interested in railway transportation.

Senator Calder declared that the attitude toward the branch line programme was a wrong one. The C.N.R. could only make to pay in one way, and that by building and encouraging the settlement and development of the country. The expansion of the branch line was strongly strangling the C.N.R."

Senator Laird also supported the bill, but the preamble was not approved on a division of 56 to 20.

Cowboy Bill Held At Stampede

MacLeod, Alta.—Charles King, of Coldwater, Alta., who was kicked in the head while attempting to ride a bucking horse called "The Devil," held the Stampede here, died without regaining consciousness. His skull was fractured. King was 27 years old, and was born in Oxfordshire, England. He came to Canada in 1906.

Teachers Go To Europe

Winnipeg, Man.—One hundred school teachers from the four prairie provinces emigrated here for Montreal to join the annual summer overseas Educational League, in which

Great Britain, France and Belgium, returning to Montreal from Cherbourg, August 21.

Facilities C.N.R. Financing

Ottawa.—Third reading was given in the Senate to the bill authorizing the Canadian National to issue bonds for 75 per cent. of the cost of equipment when Parliament had authorized 25 per cent. of the cost.

Did Not Advise On Canadian Naval Policy

Vancouver.—When the attention of Vice-Admiral Sir Frederic Gage to questions asked in the House of Commons at Ottawa, concerning the statements reported to have been made in Victoria by the commander of the British special service squadron to the effect that Canada should equip four cruisers, Admiral Gage categorically denied that he had made any such observation nor made specific reference as to what Canadian naval policy should be.

Establish New Record
For Prize-Winning

Alberta Breeders Carry Off Premium Awards At Brandon

Brandon.—Sweeping before them all the premiums in entries in the fourth annual exhibition of the Royal Manitoba Winter Fair, the Brandon fair, established a new record for prize winning at the Brandon fair. These breeders—Alberta breeders can be off the mark in the show ring and grand championships for both males and females in the Herd and for classes. It is the first time in the history of the exhibition that any one exhibitor has achieved such success in an area as large as Brandon. Leighton, Alta., also made a splendid showing in the Herd and division.

In the Ayrshire classes, which were not represented as well as in former years, the best entries were of Fairlight, St. John's, and Ralston, Alta.

Howick, Que., shared honors. Henry Thompson, also of Fairlight, was

third in the Jersey breed, while

Western exhibitors were well represented in the different classes for sheep. Prof. J. P. Sackville, of the University of Alberta, who is placing the Ayrshire, expressed himself as greatly pleased with the high quality of the exhibitors.

Soldier Returns Gratitude

Came Back to Old Job and Did Not Forget It

Bridgeland, Alta.—A former soldier in the Canadian Mounted Rifles, Bertie R. Lewis, 27 years old, a butter employer in Buffalo, has surrendered his commission and is back to his old job as a private in the Canadian Mounted Rifles.

Dr. Russell Smith, rector of St. Paul's Church, Fort Erie, to be used for the roll of any of his comrades and other officers in the service.

The young stated that any plan adopted should apply to all provinces and it would not be possible to create machinery this year, and that, therefore, attention should be concentrated on drafting a permanent rural credit scheme.

Dr. McKay also presented a report recommending amendments to the Bankruptcy Act to provide that in cases having a practical analogy to the case of a trustee, such officer may act as trustee under the Bankruptcy Act where the insolvent is a farmer.

The committee took up the proposal of H. E. Spencer (Progressive, Battle River) that the Bank Act be amended to provide that the entire bank circulation redemption fund be used to redeem the notes of all defunct banks; and that other banks should be able to recover their contributions to the circulation fund and the defunct banks' assets only after all other banks had been paid.

H. T. Ross, secretary of the Canadian Bankers' Association, said the existing fund had proved a sufficient amount. There had been no defunct banks.

W. D. Eader, Liberal, Waterloo, asked Mr. Ross if under the Bank Act the Bankers' Association had any right to inquire into the condition of an insolvent bank.

Mr. Ross replied in the negative. Hon. T. A. Crerar opposed the amendment but said no notes should be issued by the government.

On a resolution with the Spencer amendment was carried, 23 to 10. Hon. J. A. Robb voted against the amendment.

J. L. Ladine, Conservative, South Vancouver, dropped his proposal to abolish the double liability of shareholders.

Vote For "Bear" to Win

London, Ont.—A bill introduced by the Provincial Secretary's Department indicate that at least thirteen ridings have voted in favor of bear in the glass. They are: Alberta, East Cariboo, Comox, Esquimalt, Fort St. George, Gorge, Grouard, Nanaimo, Omineca, Prince Rupert, Rossland-Troll, Skeena and Yale.

The vote in Burnaby and Creston is a tie.

National War Memorial Unveiled

St. John's, Newfoundland—July 1st, Newfoundland's annual day of commemoration of the supreme sacrifice made by her sons in the Great War, was marked with a special service.

Great War, as signified by the unveiling of the national war memorial at St. John's by Earl Haig.

The ceremony took place before a gathering estimated to number 20,000 and was staged under ideal weather conditions.

Ottawa.—Third reading was given in the Senate to the bill authorizing the Canadian National to issue bonds for 75 per cent. of the cost of equipment when Parliament had authorized 25 per cent. of the cost.

Bryan Supports McAdoo

New High Mark Is Reached in Forty-Second Ballot

Madison Square Garden, N.Y.—William Gibbs McAdoo ran to a new high mark in the forty-second ballot in the Democratic national convention. He passed the much-sought goal of 500 votes and, to the chagrin of fractious work and persuasion and maneuvering on the part of his floor managers, who declared that he had made no such observation nor made specific reference as to what Canadian naval policy should be.

Running close to the 46 and 44 ballots of the 41st and 40th national conventions, respectively, the New York exhibition gave promise of setting a new mark. McAdoo hit his high mark so far in the fortieth ballot that he was 100 votes short of 500, while at that time had drawn a little below his high level, 323½, made previous ballots. At the close of the thirtieth ballot McAdoo had stood at 400, while 750 were needed.

John W. Davis, of New York, was at that time had drawn a little below his high level, 323½, made previous ballots. At the close of the thirtieth ballot McAdoo had stood at 400, while 750 were needed.

John W. Davis, of New York, was

at that time had drawn a little below his high level, 323½, made previous ballots. At the close of the thirtieth ballot McAdoo had stood at 400, while 750 were needed.

The feature of the session was the election of James F. Martin, who, because of his name, took the platform and declared himself for McAdoo. He declared the Democratic candidate must be firm for prohibition.

The Ayrshire classes, which were

not represented as well as in former years, were of Fairlight, St. John's, and Ralston, Alta.

The Cry Of The Children

The Crime of Exploiting Young Children For Profit
(By Dr. J. G. Shearer)

one of the subjects seriously discussed at the Great Parliament of Social Workers in London recently. In the Southern States Cotton Mills numbers of young children are exploited for profit. Many parents are willing they should be. The 18th Amendment is not yet strong enough to prohibit the 20th century's violation of the Constitution giving the Federal Government control over child labor. Canada is without such child labor laws. The American example of not permitting college students became a necessity. The universities and allied organizations have taken keen interest in the matter, establishing employment bureaus, large showrooms, and houses, book stores, laundries, printing shops, and even small factories where students are employed in off hours. The usual pay is one meal a day and a room.

At Göttingen University, for instance, 1,000 students earn their noon-day meal and about 500 their supper by manual and clerical work.

It is to be hoped that the gradual disappearance of the old-time student attitude and attitude of superiority toward the town folk.

A Superior Race
The young lords are chirping in their nest.

The young ladies are playing with the shadow.

The young flowers are blowing toward the west.
But the young young children, O my brothers,

They are weeping bitterly!

They are weeping in the playtime of the old.

In the country of the tree.

They look up with their pale and sunken faces.

And their looks are sad to see.

For the man, heavy angles draw and creases.

Down the chokes of infamy—
to eat, children, from the mine and
from the city—

Sing, O children, as the little
thrush does.

Does your handafe of the meadow
convulse pretty—

Liegh about, to rest your fingers
let them bloom!

But then, O children, Are your cowslips
of the meadow.

Like our weeds near the sun?

Leave us quiet in the dark of the coal-shadows.

From our shoulders up and down—

For only say the children, we are
weak—

And we cannot run or leap—

If we cared for any muscles, we were
weak—

To die alone in them and sleep.

Our knees trouble sorely in the sleeping—

We fall upon our faces, trying to go;
Underneath our hairy eyeballs

The reddest flower would look as
pale as snow.

For all day, we drag our burden
tiring—

Through the cold-dark underground,
Or, at day, we drive the wheels of
triumph.

In the factories, round and round,
and all day, the iron wheels go on—

Urinating fire down from its Maker,
And the children's souls, which God to
calling onward.

Spiral blindly in the dark—

They know the grief of man, without
his wisdom;

They know the man's despair, without
its gloom—

Are slaves, without the liberty of
Christendom.

Are martyrs, by the pang without
the pain—

And worn as it with age, yet un-
tiringly.

The harvest of his memory, radiant
rose—

Are nephews of the earthly love and
eternity—

Let them weep! Let them weep!
They look up, with their pale and
sunken faces.

And their looks are dead to see.

For the man, heavy angles draw

and creases.

With eyes turned on Duty;

"How long," they say, "How long, O
constant nation—

With a will to move the world
on a child's heart—

Strike down with a mailed heel its
palpitation;

And tread onward to your throats
amid the mist?

Our hearts expand upward. O gold
hearts—

And your purple shows your pain;

But the child's soul in the silence
curves despair.

Then the strong man in his
wrath—

Not Improbable

Judge—The man says after he
fired a shot he saw you run from his
cannon coop.

Run away—He could easy be
mistaken, judge. Fast as Ab was
runaway! It might have been someone
else what faintly resembles me

Adopting American Custom German University Students Help Put Themselves Through

The self-help student, unknown in Germany before the war, is now increasing in the universities, due to existing economic conditions. It is estimated that only half of the student body of the country receives less than \$15 a month each from home, and that the American custom of part-time work by college students became a necessity.

The universities and allied organizations have taken keen interest in the matter, establishing employment bureaus, large showrooms, and houses, book stores, laundries, printing shops, and even small factories where students are employed in off hours. The usual pay is one meal a day.

At Göttingen University, for instance, 1,000 students earn their noon-day meal and about 500 their supper by manual and clerical work.

One of the most popular is to be the practical disappearance of the old-time student attitude and attitude of superiority toward the town folk.

Restrict Potato Importation Guarding Against the Introduction of Plant Diseases

The potato growing industry in Canada is being safeguarded against the introduction of plant diseases by a recently enacted regulation of the Department of Agriculture at Ottawa. Potatoes grown in Europe, the Canary Islands, Newfoundland, the islands of St. Lucia and Martinique, and the state of California, may no longer be imported into this country, while imports from the states of Pennsylvania, West Virginia, and Maryland are restricted only when accompanied by a certificate giving the name of the state in which the stock was grown.

After Mr. Martin, Minister of Agriculture, had slept on the floor of a cell at Worcester, Mass., to protest against the mistreatment of his wife, Mrs. Martin, he was received by the Minister of Agriculture, Mr. J. G. Shearer, at his office in Ottawa, and was given a room in the Canadian Hotel.

Mr. Shearer, who is a member of the Canadian delegation to the League of Nations, said he had been invited to speak to the Minister of Agriculture, Mr. J. G. Shearer, at his office in Ottawa, and was given a room in the Canadian Hotel.

Only Small Percentage Of Population Of The Dominion Born Outside Of British Empire

Those who fear that Canada is becoming too heavily populated by a people of foreign stock may take comfort from the Census Bureau's bulletin assuring our population on the birth of origin and birthplace. The figures show that 5,400,000 persons in Canada are not of British birth, and that of these a large number came to us from the United States—people mentioned in the same train as we having much the same status as ourselves.

In the decade the population of the Dominion increased by 1,581,540, and the Canadians born accounted for 1,215,065, while immigration from the British Isles numbered 229,821, and natives of other British countries 10,333. Only 157,549 came here from outside the Empire; the United States supplying 70,341 of the total. In other words, 70,341 of the foreign population in the ten years, exceeding the United States, was less than 70,000.

If we continue to increase our population from the same sources as before we will have a population of 100,000,000 who are ours—there is hardly a question but that we can absorb 85 Canadian for the majority of foreigners that come to us. Last year we received 145,560 immigrants of whom 72,221 were from the United States, 21 from the United States, and 55,129 from other countries.

In 1912 when immigrants came to us at the height, 462,172 came in, and 160,542 from the British Isles, 159,099 from the States and 112,531 from other countries.

It should be noted, too, that the term "other countries" includes Norway, Sweden and Denmark, from which we have great numbers of boat and steamship immigrants.

The Census Bureau locates the majority of the Scandinavian settlers on farms, while Greeks, Italians and Poles (and Gallaedians) are found mostly in the cities.

If we take the large numbers of more desirable farm immigrants there remains but a small proportion of our foreign immigrants who are likely to remain rural. There are many groups to whom "other countries" in our larger cities, and who, we are told, are perhaps unaccustomed to the social tendencies underlying much of the evil in Europe. Yet some of the most fervent of our so-called "other lands" from the British Isles come from London, Liverpool, Clyde. Certainly they are among the most law-abiding. There, however, we may possibly sensible treat with the same unconcern that the London, Liverpool, Manchester and other ports of Mercantile marine have for the Hyde Park area. The "boobies" have long since learned that they are not dangerous to you let them talk—Ottawa Journal.

Panama Carried More Tonnage Than Suez

Oil Responsible For Traffic Gain On American Waterway

The fact that the Panama Canal, through which the tonnage is computed, is now carried less tonnage we believe, the first time in history—a larger tonnage than did the Suez Canal, the great waterway of the east, is worth noting.

In 1912, the Panama Canal transported 20,100,000 tons, while its tonnage competitor, carrying 26,243,000 tons of freight, to 32,922,000 tons passing through the Panama waterway.

In 1913, however, the Panama Canal reached 22,77,000 tons, or nearly double that of the preceding year, while the Suez Canal carried 22,726,600 tons of freight. The difference may be comparatively slight, but it was enough to put the Panama Canal in the lead.

Why the panama Canal outperformed so much so far as tonnage is concerned is not clear. The tanker trade from California is given as the chief factor in the enormous traffic gain on the American waterway.

Want Convention **Interventus** **Will Be Explored**

The British Government has agreed to a scheme inaugurated by the Governor of the Gold Coast, West Africa, for the construction of a large number of schools for the education of the children. The chief point of this university is given out as being for the education of Africans desiring to enter any profession, without the necessity of going to Europe.

Railway Rivalry In Efficiency

Country Benefits Generally From the Healthy Rivalry Between Two Great Roads

Not so long ago Canadian railway tables were honored in the hearts of the nation. The improvement in the running of the Canadian Pacific and the Canadian National Railway and its predecessor is most marked because formerly the practices were particularly bad. During the "Trans-Canada" era, the Canadian Pacific Railway in the Ottawa area at 10:45 a.m. and travellers all the way from Vancouver are able to set their watches at every divisional point by the printed time-table. Can't imagine that in the days of the train crews, and the machinery that keeps the track clear.

The country generally benefits greatly from the healthy rivalry between the two roads. That is not being carried to the extreme that in one road carries one publicity and the other privately owned. Both incidentally are striving to do the best possible work.

The Canadian Pacific has been giving its best to the Canadian market which brought about the importation of dollars into Canada last year without going beyond the fringes of the gold mine that waits to be tapped, and the rail and hotel services that are giving the greatest service to the public.

The CPR has for years been noted for the splendid esprit de corps of its staff, and travellers are nothing with satisfaction that Sir Henry Thornton and his aids are meeting with much success in the same direction on the other railway—from the Ottawa area.

The Tragedy of the Treeless Town

By Archibald Mitchell, of the Canadian Forestry Association

The other side of the picture is the treeless town—the callused, skeletal bundle of houses where nothing but trees and shrubs are to be seen in east and west, with no pleasurable association to bind their inmates with love of the green, growing things they cherished in childhood and in their day. Children are born in these towns to come into the world, free no pains of parting from the trees they planted with their hands, and the first thing they do is never plant a tree. The houses have no affectuate longing, in after life to again see the leafy, gnarled maple whose tapping at their bedroom window welcomes them, and happily at the mottled sunlight dancing through the interlacing of the silvery foliage.

Trees, flowers, green grass—these bring life to the houses they have home. There, in the corner of the lawn, is mother's tree. Its blossoms were the finest and sweetest in the garden. Down by the gate is the sturdy fir that dad planted that is now nearly as tall as the house. You helped him. He dug the holes, held the tree straight while dad carefully packed the brown earth about its roots. The root, "dad, mother, and I" are all dust. But the trees they leave remind you to link you up to the memory of other days when an unfriendly nature sat at the beetles' conference, shading shade, and "trees" quivered the treeless—

the mottled sunlight, dancing through the interlacing of the silvery foliage.

Black Bass For Saskatchewan Lakes

The fishery department of the Canadian government is engaged in the task of carrying out the recommendations of the famous Ontario Black Bass, and is hoping to secure the co-operation of anglers in properly stocking the waters of Saskatchewan with these fish.

The fishery department is also to proceed in stock small lakes that are at present barren of fish, with perch.

Universities in Africa

The British Government has agreed to a scheme inaugurated by the Governor of the Gold Coast, West Africa, for the construction of a large number of schools for the education of the children. The chief point of this university is given out as being for the education of Africans desiring to enter any profession, without the necessity of going to Europe.

Has One Advantage

An electric machine that lays as many bricks as 20 workmen is being used to lay the building stones—a feature of it being that it doesn't have to stop every few hours to light its pipe—Hamilton Herald.

And Suffered More

Justus—It's outrageous! I merely trifled with the beautiful Helen made and she hit me with one of them.

His in-Law—Foolish boy you got off easy. Her father ate you up my first batch.

New Industry For Vancouver Island

Only Place in Canada Where Bulbs May Be Grown Commercially

Vancouver Island is practically the only place in Canada where bulbs may be grown commercially. There are a few other locations on the mainland of British Columbia may be suited to bulb culture, but they are not yet extensively grown.

Flowers and bulbs have been grown in Canada from Europe, where they have been grown for many years, and are put on our market at a low price.

Recently disease has developed in the imported flowers, and the Canadian National Railway and its predecessor is most marked because formerly the practices were particularly bad.

During the "Trans-Canada" era, the Canadian Pacific Railway in the Ottawa area at 10:45 a.m. and travellers all the way from Vancouver are able to set their watches at every divisional point by the printed time-table. Can't imagine that in the days of the train crews, and the machinery that keeps the track clear.

The country generally benefits greatly from the healthy rivalry between the two roads. That is not being carried to the extreme that in one road carries one publicity and the other privately owned. Both incidentally are striving to do the best possible work.

The Canadian Pacific has been giving its best to the Canadian market which brought about the importation of dollars into Canada last year without going beyond the fringes of the gold mine that waits to be tapped, and the rail and hotel services that are giving the greatest service to the public.

The CPR has for years been noted for the splendid esprit de corps of its staff, and travellers are nothing with satisfaction that Sir Henry Thornton and his aids are meeting with much success in the same direction on the other railway—from the Ottawa area.

Canada may not have been able in the past to compete with the cheaper labor of Europe, but that matter is rapidly adjusting itself, for labor is no longer adjusting itself, for labor is, besides, untaxed. The result in this respect has been practically cutted.

Opinion Of Editors

From the Canadian Think Western

Lawson

"Western Canada is right, and is off to a fair start for another splendid crop of the powerfully making kind," according to the concession or opinion of the important group of Canadian agriculturists who gathered at a meeting in a town of the west that included a tour of every Canadian city as far west as Victoria. This party included the most prominent men of the department of agriculture, Saskatchewan, who has made a name for itself in the west, and the author of the great report that appeared in the Canadian Think Western.

(Continued)

The sergeant asked for the victim's next of kin and who should be notified.

"Oliver never spoke of his family," answered the factor. "Had a picture or two on the packing box he used for his business, but nothing else. Said he had no wife or children or any other relations. Said to notify the head office if anything went wrong with him. That's all I know about him."

"The trail had been started to him in the trailhead thoughts."

He had two inquiries on his hands, to say nothing of the trailhead thoughts. For the moment foremost was the fact that he had promised Considerable La Mar that he would see there remained that suspicion, born from his own narrow escape from the hands of the killer.

He led the way from the trailhead thoughts to the trailhead, then moved ahead into the main trail, a short distance, when he heard a beaten down between the banks of a snow.

A shout from down-trail startled them. From out of the increasing dusk, like panthers, bushy tails wags, came dragging a light sled. Wondered to see the trailhead, who had been to give a gangster. The arrival of a strange team at that time of the year was a surprise.

The sled was broken to a half a ways down the trail. A tall driver, with a wide, smiling face, sprang from the basket and waited for them to come up.

"I'm a trailhead uniform in passing—and I need direction."

The voice sounded clear as a bell on the trailhead thoughts, and was feminine. Moreover, it carried none of the accent peculiar to the half-trailhead thoughts.

"They spoke English. They looked closer. Into a face of pure white and of the mildest expression, and the trailhead with a soft finger.

A white woman in Armistice—a young woman of their own race?

"Think how incredible it must seem to you that I'm here in the trailhead to an October-April winter of legislation."

The Sergeant Seymour, of the Mounted, in charge of this detachment, offered the policeman, for once again, a smile. "Who's your looking for, ma'am?"

"I must find Oliver O'Malley's trailhead."

"And who might be seeking your young trailhead?" The sergeant kept his eyes on the trailhead of the dread that had clutched him.

"Moira O'Malley of British Columbia."

This astounding complication left the three men speechless, glad for the fact that nothing more than the connection that must be written on their faces.

CHAPTER IV.

Best Of Bad Business

In his grown-up life, Sergeant Seymour had not a moment of entire contentment. He had to take on the right and proper thing—the hard way. He had given up for a more difficult proportion than that presented by the young woman who had come to him with the news of the breather she had had.

"She had no time for what lay in the trailhead but they had just replaced under Mountie Police—so, he was distressed at the trailhead and the disaffection that must be hers when she learned the truth. She had been a trailhead within him promptly interposed her anger against his blunting out the facts, particularly. He felt that he must temporize.

"You've come to the right, camp, Moira. You're the only ones who can be in to-night. In the morning. But surely you did not rush from the trailhead."

A small sigh, doubtless of disappointment, in the further delay, passed over the lips of the trailhead. Evidently she was a self-contained young person.

She explained readily, she had not come alone. The Rev. Luke Morrow and his wife were behind with their bed and they had traveled

only from Wolf Lake. The Rev. Morrow, it seemed, was a friend and relation of the trailhead. He had been mentioned at Gold, British Columbia.

"Only munched from 'Wolf Lake'."

She had been to the trailhead, the only, although after one glances into the only, face of the woman he had seen in the trailhead.

The trailhead went away to the trailhead.

"The trailhead went away to the trailhead."

She had dashed off with the trailhead.

"The trailhead went away to the trailhead."

She had dashed off with the trailhead.

RHEUMATISM GONE, SAYS MONTREAL HOTEL MAN

F. A. Mongeau Tells How He Recovered Strength After Eight Years Of Rheumatism.

F. A. Mongeau, popular night clerk at the Princess Hotel, 17 and 19 1/2 Avenue, Montreal, Canada, lends his name to further the cause of Tanlac, the treatment that has proved of such great benefit to him.

"After all Tanlac has done for me," said Mr. Mongeau, "I just feel like praising it to everybody. Eight years of muscular rheumatism had just about made a cripple of me. I got to where I simply had to limp around, was very nervous because affected, my sleep was bad and I felt completely knocked out."

"Six bottles of Tanlac, taken eight months ago, made a new man of me and I have had further trouble with rheumatism, or my health since. My nerves are steady as a die, I sleep fine and feel the same way. Anyone wanting to know of me what Tanlac will do, just phone me here at the hotel."

Foretells Roadhouses For Air Travellers

British Air Minister Takes Peep Into the Future

After having taken a deep into the future, Air Minister Lord Thomson came down to the House of Lords recently and assumed the role of prophet. He said in three years' time he hoped to have in the air two kinds of aircraft, one for the carrying of passengers and naval purposes, the other for cargo.

He said: "I hope to have in the air two kinds of aircraft, one for the carrying of passengers and naval purposes, the other for cargo. The day when public roads will leave Parliament House on gliders with light engines, and wing their way westward along the Thames valley or northwards to somewhere in the North Sea, we will need a road and perhaps they may come in as great caravaning floating serene, safe, high up far removed from terrestrial fuss and noise."

Mathematicians To Meet

Seventh International Congress To Be Held In Toronto In August

Mathematicians from every part of the globe will attend the International Mathematical Congress which is taking place in Toronto in August, concurrently with the meetings of the British association for the advancement of science, the organization of this body, which constitutes an international parliament on mathematical matters, have been held in Europe. Over 150 delegates from Europe will attend, as well as presentatives from the United States and Canada.

B.C. Lumber Shipments

British Columbia lumbermen are receiving large orders and about two million feet were ordered within the past few days. In addition there is a full cargo of logs ordered for Post-Embarcadero, and there are new orders from Japan, China, and the past week probably ten million feet of lumber has been ordered from British Columbia mills.

"It's all right for a man to talk himself up provided he doesn't run off down."

Tanlac is for sale by all good drug-gists. Accept no substitute. Over 40 million bottles sold.

Shipping Not Yet Efficient

Will Take German Mercantile Fleet Years to Recover

It will be a good many years before the German mercantile fleet attains its pre-war standard, in the opinion of Carl Stimming, director-general of the North German Lloyd.

"For some years," Mr. Stimming said, "we have been engaged in a shipping conference in London, "we have made up with the progress we have made up to the present time."

Leopold Koenig, managing director of the Hamburg American Line, returning from the conference, said: "I heard there was not the slightest chance of his line resuming its fast pre-war standard of sailing to and from New York for many years. There is no way to shorten the time."

Sometime in the future, the German fleet will be back in the day when public roads will leave Parliament House on gliders with light engines, and wing their way westward along the Thames valley or northwards to somewhere in the North Sea, we will need a road and perhaps they may come in as great caravaning floating serene, safe, high up far removed from terrestrial fuss and noise."

Mathematicians To Meet

Seventh International Congress To Be Held In Toronto In August

Mathematicians from every part of the globe will attend the International Mathematical Congress which is taking place in Toronto in August, concurrently with the meetings of the British association for the advancement of science, the organization of this body, which constitutes an international parliament on mathematical matters, have been held in Europe. Over 150 delegates from Europe will attend, as well as presentatives from the United States and Canada.

B.C. Lumber Shipments

British Columbia lumbermen are receiving large orders and about two million feet were ordered within the past few days. In addition there is a full cargo of logs ordered for Post-Embarcadero, and there are new orders from Japan, China, and the past week probably ten million feet of lumber has been ordered from British Columbia mills.

"It's all right for a man to talk himself up provided he doesn't run off down."

WORLD HAPPENINGS BRIEFLY TOLD

Modern methods of whaling have become so effective that there is danger of the great sea mammals disappearing from our seas.

Charles E. Moyse, 72, for many years vice-principal and dean of the faculty of Arts at McGill University, is dead.

Dr. Heinrich Held, newspaper owner and leader of the Bavarian People's party has been selected as the Bavarian premier. He succeeded Dr. von Kneiff.

Premier Hitler asked and was given a vote of confidence of 454 to 26 on a 205,000,000 franc appropriation to cover expenses of the occupation of the Rhin.

Delegates from all parts of the Dominion and Pacific sailors will gather in Vancouver from August 1 to 9 for the annual convention of the Canadian Dental Association.

The government is carrying on negotiations with shipping interests in Canada, with a view to securing a reduction in the ocean rates on Canadian cattle.

An issue of province of Alberta bonds amounting to \$750,000 bearing interest at 5 per cent, and repayable at fifteen years, has been awarded to Toronto syndicate at a price of 97.50.

Is Your Nose Stuffed With Cold?

Don't read your newspaper with cold nose.

Send healing medicine to the nostrils — send it into the passages in the nose and sinuses with Catcrazhone.

It's easy to get rid of a cold. Drive out to Catarrah, to strengthen a weak cold.

Get Catcrazhone from your druggist today. By using this safe and effective sages free from germs, and thereby prevent a bad cold. Write for a sample size.

Refuse a substitute. By mail from the Catcrazhone Co., Montreal.

Let Wet Finish It

Plan to Hand Over At Railway

At the present session does not make provision for the early completion of the Hudson's Bay Railway — the "To the West" line.

The development of the Hudson's Bay line has been a source of concern to the Canadian government.

The Federal Government is urged to make an offer to the prairie governments "or any of them" which will include "all of the physical assets of the Hudson's Bay line."

The balance of money collected under land sales contracts paged by the Government of Sir Wilfrid Laurier for the completion of the Hudson's Bay Railway.

British Increases Old Age Pensions

Chancellor of Exchequer Hopes Soon To Reduce Age Limit

A group of ministers in Great Britain are to have one or even two more as a result of the extension of the old age pension scheme, which has received the approval of the House of Commons.

Philip Snowden, chancellor of the exchequer, who during the recent financial crisis, said single persons having an income, not necessarily earned, of 25 shillings weekly, will be entitled to 10 shillings weekly, and those whose incomes come with income of 50 shillings weekly will be entitled to one pound sterling, jointly, a week.

The cost of the additional scheme will be £1,000,000 in its first year, but will rise to £2,000,000 in the second.

The proposals, said the minister, in no wise could be regarded as a final settlement of the problem of old age pensions.

He hoped shortly to submit a scheme of mothers and widows' pensions and reduce the age limit to 65.

Shipping Tar Sands

Programme an incomplete for shipping out large quantities of tar sands from Waterways, Alberta, arrangements being such that the material can be loaded on the railway cars with very little handling. The plant from which the materials will be made is located at the bottom of a cliff more than 200 feet high. This is practically a solid mountain of asphaltum, which can be mined in the most economical manner.

World's Deepest Well

The world's deepest well is in Neu Gobelin, France. Boring was started in 1892, and by 1914 a depth of 10,000 feet had been reached.

Mr. O'Brien, a big black bug on the ceiling.

"Oh, dad, there's a big black bug on the ceiling."

"All right step on it and don't bother me."

True To His Country

"What did he die of, Mrs. Malone?" "Gangrene, Mrs. Flanagan."

"Thank you, I think for the color, Mrs. Malone."

In Great Britain the women exceed the men by nearly 2,000,000.

Minard's Liniment Relieves Pain

Sir Henry Thornton On Finance

Canada As a Field for Investment Of American Capital

In addressing the thirty-first annual convention of the New York State Bankers' Association held last week in Montreal, Sir Henry W. Thornton, president of the Canadian National Railways, placed before the members of the United States and Canada demands that these natural resources of Canada be developed along sound and practical lines, and he urged the members to invest in those fields that had money to invest, educate the clients to the benefits to be derived from investments in the vast mineral and other natural resources of the Dominion. The speaker said in part:

"The fact is that the public has been compelled to appraise Americans that the time is more opportune than ever for those from the United States to invest in Canada, and to have more cash in Canada than you have in the United States; we have natural resources and mineral deposits whose surfaces have not been developed and with lands sparingly settled, the time is ripe for the public to

invest in the clients of the banks that have

been established right here that she will stand out as one of the greatest assets of the country."

"Bankers are playing a big part in the affairs of the world today and it may be truthfully said that no body of men in the universes of finance has done more to develop the natural resources, governments and peoples as have the bankers of the United States. Financial crisis which have struck home into the hearts of mankind have struck home into the hearts of United States bankers, and the public has been compelled to appraise Americans that the time is more opportune than ever for those from the United States to invest in Canada, and to have more cash in Canada than you have in the United States; we have natural resources and mineral deposits whose surfaces have not been developed and with lands sparingly settled, the time is ripe for the public to invest in the clients of the banks that have

been established right here that she will stand out as one of the greatest assets of the country."

Ripley District

Intended for last week

The Ripley district celebrated the last day of school on Friday afternoon, June 27th, by holding a picnic, but owing to the weather, whether the attendance was not large.

In a game of baseball the boys won by the score of 17-11. After the gathering had spent a time at the ice cream parlor, cake, juice and prizes were the following with prizes: For perfect attendance, Esther Olson, fountain pen; Harold Olson, who was absent half a day, pencil box. For neat notes books in the different grades: Floyd

Cockrell (VII) school bag; Lester Olson, photograph album; Glen Barratt (V) pencil box; Jessie Curr, Jove Curr and Bonnie Siebert (IV) snapshot albums; Mrs. Mann, snapshot album; and Donald (III) box of paints. Good conduct, Hilda Hill, fountain pen; Mrs. A. Findlater, the teacher, was given a box of chocolates and a pencil box; and Mrs. E. E. Edwards, for Saturday for a ten day motor and fishing trip to the Rockies, going via the Banff-Windemere road.

The heavy wind of Sunday was the cause of considerable damage to trees and shrubs, and several rural telephone lines were put out of commission.

Mr. and Mrs. C. Cairns and Mr. and Mrs. E. E. Edwards, on Saturday for a ten day motor

and fishing trip to the Rockies, going via the Banff-Windemere road.

The Women's Guild of St. Monica's Church, will meet at the home of Mrs. E. E. Edwards on Tuesday afternoon, June 17th, at two o'clock. Mrs. J. Brindie will serve tea.

Mrs. T. Wilson, of Claremont, Ont., arrived in Mirror on Saturday, June 17th, and will spend the summer visiting her son Lester and his sister-in-law, Mrs. J. Stevenson, Mrs. Fred, Dowell and Mrs. E. Irwin.

Mr. and Mrs. D. J. Jewell, accompanied by Mr. and Mrs. G. Lowe, of Alix, are away on a two week holiday. They are on the trail, motoring and fishing along the route of the Banff-Windemere trail.

Mrs. H. W. McKeown returned to Calgary on Wednesday (May 24th) after a week's vacation with her daughter, Mrs. G. K. Tilley, Miss Helen Tilley, accompanied her to Calgary, and will visit in Lethbridge for a month.

Donald McNair motored to Cypress on Monday morning to meet his sisters, Mrs. B. Black, of Detroit, Mich., and Miss Clara McNair, of Yorkton, Sask., who will spend a month visiting with relatives in Mirror and Bashaw.

A. Common and son Jimmie, H. W. Panrucker and F. G. Gasser motored to Ponoka last Saturday to see the Calgary Stampede, and then the Edmonton Vets in a football game for the championship of the province. Calgary won it goal to 0.

Mrs. H. S. Oldring, accompanied by a number of Mirrarians, left for a vacation to the C.G.T. camp at Ponoka, Tuesday evening.

Miss Stevenson, Nellie, Mrs. Oldring, Grace Tulluch; Edna Olsen and Margaret Curr from Ripley; and Grace Ballantyne and one from Ardley.

Mr. and Mrs. C. L. Pendleton, and two sons, visited with Mrs. Shillingford's parents, Mr. and Mrs. W. W. Sharp for a day or two this week. Mrs. A. M. Pendleton was also in the party. All the persons mentioned went to Calgary today (Wednesday) to attend the Stampede and will return to Mirror about the 1st of July, when Mr. and Mrs. Shillingford will return and will continue on their trip to points in Saskatchewan and Manitoba.

Buy Your Ticket Locally

When making a trip to some distant point, why should you buy your way ticket at the station here. When you go to the city to buy your ticket, you are out your fare and expenses and pay the same rate as you would have here.

Buy here. Save this extra cost—and increase Mirror business if you contemplate a trip to the Old Country, or if you plan to bring friends from the Old Country, all arrangements can be made with the local Canadian National Station Agent, who represents all steamship companies.
